

Boolean Search → Open Job → Hiring Type → Company Check → Repeatability → Workload → Decision (KEEP / REJECT) → Scoring (only for KEEP) → Priority

STEP 0: SOURCE

👉 Use this Boolean to find leads:

site:linkedin.com/jobs
("customer support" OR "technical support" OR "support specialist" OR "QA engineer" OR "implementation specialist" OR "operations associate")
("hiring multiple" OR "multiple openings" OR "scaling team" OR "high volume")
"remote" ("USA" OR "United States")

-"AI" -"machine learning" -"data scientist"
-"principal" -"architect" -"research"
-"consulting" -"staffing" -"recruitment" -"agency"
-"solutions" -"partners" -"services"

👉 This ensures:

- Only execution-type roles
 - Removes most junk upfront
-

STEP 1: TYPE OF HIRING (FIRST FILTER)

✅ **KEEP (Execution Work)**

If roles look like:

- Support / customer service
- QA / testing
- Operations
- Implementation
- Mid-level developers (non-complex, repeatable)

👉 Meaning:

Work is repetitive and scalable

REJECT (Capability Hiring)

If roles look like:

- AI / ML / Data
- Architect / Principal / Head
- Research / complex engineering

👉 Meaning:

High ownership, not outsourceable

👉 ⚠️ Rule:

If ANY such role appears → REJECT immediately

STEP 2: COMPANY CHECK (Second Filter)

Tick all:

- ☐ Not HR / staffing / recruiting company
- ☐ Not consulting / services / solutions
- ☐ Not marketplace / platform hiring for others
- ☐ Not large enterprise (1000+)

👉 If ANY fails → REJECT

STEP 3: HIRING PATTERN (Third Filter)

👉 Look at Jobs tab

Tick at least ONE:

- ☐ 3+ same/similar roles
- ☐ Same job repeated
- ☐ Same role across locations

👉 If NONE → REJECT

STEP 4: WHAT WORK IS INCREASING? (Fourth Filter)

👉 Write in ONE LINE:

✅ Good:

- “Customer support load is increasing”
- “QA workload increasing”
- “High volume of queries/tickets”

❌ Bad:

- “Company is growing”
- “Scaling team”
- “Maybe they need help”

👉 If not clear → REJECT

STEP 5: FINAL DECISION

✅ KEEP

- Execution hiring
- Same role repeated
- Clear workload

❌ REJECT

- Failed ANY step
 - Wrong company type
 - No repetition
 - No workload clarity
-
-

STEP 6: SCORING (ONLY for - “KEEP”)

IMPORTANT:

Scoring is for prioritization, not decision

Execution Signal (0–3)

- 0 = Single role
 - 1 = 2 different roles
 - 2 = 2–3 similar roles
 - 3 = 3+ same roles
-

Hiring Intent (0–3)

- 0 = Generic
 - 1 = Active
 - 2 = Multiple roles
 - 3 = Urgent / repeated
-

Company Fit (0–2)

- 0 = Enterprise / irrelevant
 - 1 = Weak fit (indirect buyer)
 - 2 = Strong fit
-

Remote (0–2)

- 0 = Onsite
 - 1 = Hybrid
 - 2 = Remote
-

Buying Trigger (0–3)

- 0 = None
- 1 = Weak assumption
- 2 = Logical signal
- 3 = Clear workload spike
